## About me

I'm an ambitious undergraduate student majoring in software engineering with a keen interest in discovering and experimenting with cutting-edge technology. I am able to quickly adapt to changing circumstances.

## Education

### Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology (specializing in Software Engineering)Sep. 2021 - Present

- Course Work: Computer Networks, Database Management Systems, Mathematics for Computing, Object Oriented Programming, Operating Systems and Computer Architecture, Software Process Modelling, Database Structures and Algorithms, Mobile app development.
- CGPA - 3.34

### National Institute of Business Management (NIBM)

Certificate course in Computer ScienceOct 2019 - March 2020

- Course content : Introduction to computer science, Web design and development (html,css) , Introduction to computer architecture and computer hardware, computer networking and internet technologies, computer programming(c, c#) , Database design and development, concepts in digital electronics.

Advanced Certificate Course in English LanguageSep 2019 - Feb 2020

- Award : Merit pass

### Matara Central College

Passed Advanced Level Examination in physical science stream with CSS

## Technical Skills

Programming	C/ C++, C# , Java, JavaScript ,Kotlin , PHP, Python
Databases	MySQL, MongoDB
Libraries/Frameworks	React.Js
Other	Figma. Git/ Github

## Academic Projects

Happy Tails

[visit](#) [visit web site](#)

Functional pet shelter management system. This comprehensive system is designed to streamline shelter operations, allowing staff to manage everything from pet intake and medical records to adoption.

Technologies: MongoDB, Express.js, React.js, Node.js

iCLOTHES

A completely functional web application for garment factory to manage their garments and textiles.

Technologies: HTML , CSS , JavaScript , PHP
